The Typical 1-2-3 Setup

FX 1-2-3 Method

Basic Concept

- During any trend, up or down, the market forms little peaks and valleys

FX 1-2-3 Rules

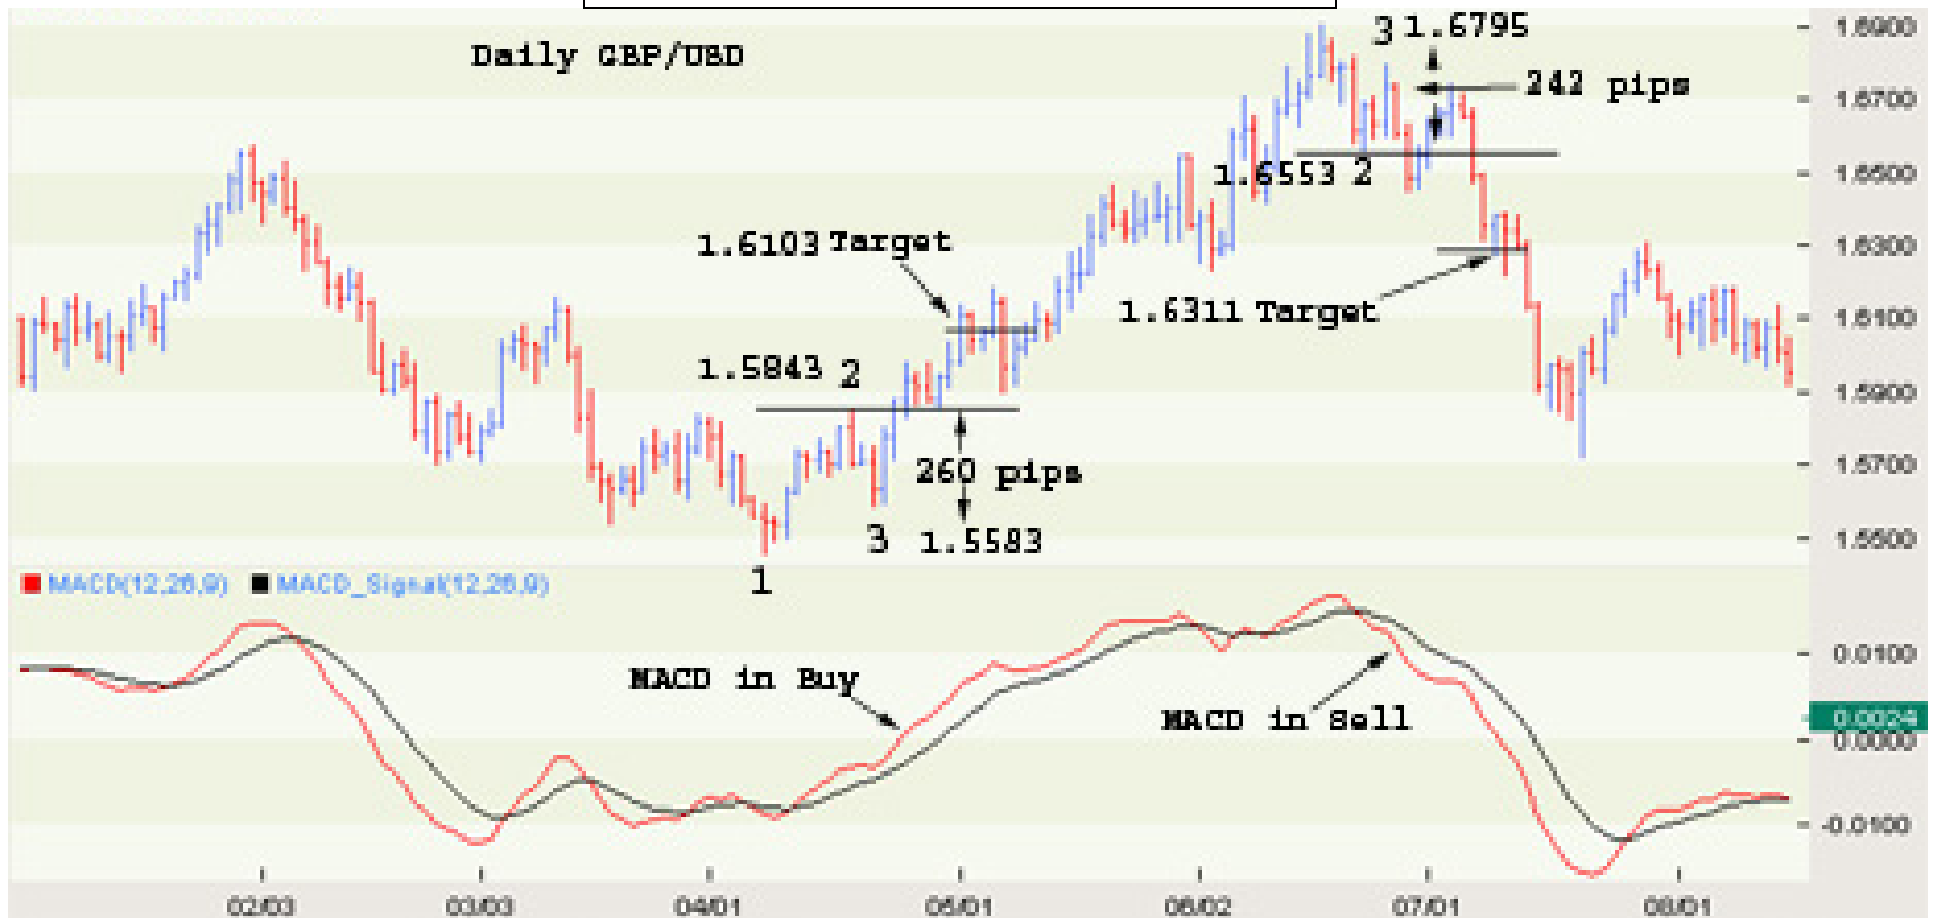

Uptrend

1. Works best as a (trend) reversal pattern so identify a previous downtrend
2. Wait for MACD to signal a buy (crossing) and for the 1-2-3 setup
3. As the market pulls back to #3, MACD should remain in buy mode (or slightly dip into sell)
4. (As a way of testing the system) Place buy entry 1 pip above #2
5. Place a stop loss 1 pip below #3
6. Measure the distance between #2 and #3 to project your exit
7. #3 should not be lower than #1

*** The reverse is true for a downtrend ***

Let's look at some examples!

Daily GBP/USD

5 Min USD/CHF

4 Hour EUR/USD
